TECHNOLOGIES

## Data Sheet

### Description

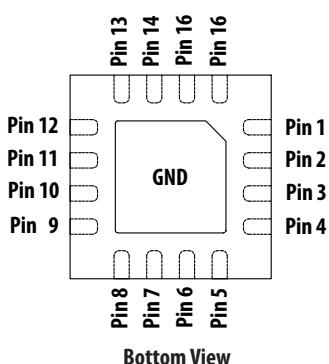

Avago Technologies' MGA-16516 is an economical, easy-to-use GaAs MMIC match pair Low Noise Amplifier (LNA). The LNA has low noise and high linearity achieved through the use of Avago Technologies' proprietary 0.25um GaAs Enhancement-mode pHEMT process. It is housed in a miniature 4.0 x 4.0 x 0.85mm<sup>3</sup> 16-pin Quad-Flat-Non-Lead (QFN) package. The compact footprint and low profile coupled with low noise, high gain and high linearity make the MGA-16516 an ideal choice as a low noise amplifier for cellular infrastructure for GSM and CDMA. This device is applicable to both Single and Balance mode. It is designed for optimum use from 500MHz to 1.7GHz. For optimum performance at higher frequency from 1.7GHz to 2.7GHz, the MGA-17516 is recommended. Both MGA-16516 and MGA-17516 share the same package and pinout.
