

364 Series Dual BNC Right-Angle Jack PCB Connectors

Product Description

Winchester's Bomar brand 364 Series Dual BNC Right-Angle PCB Jack Connectors are ideal for high-density applications in a wide range of industries including Broadcast, Telecommunications, Test and Measurement, Security, and Medical.

Dual BNC Right-Angle Connectors feature two "vertically stacked" BNC Jack Connectors and consume 50% less PCB real estate as compared to two right-angle connectors mounted side by side.

The 364 Series Dual BNC PCB Jack Connectors are available in 50 Ohm and 75 Ohm impedance in both isolated or panel-ground versions.

Isolated BNC Jacks are made with black or white UL 94V-0 PBT Thermoplastic material.

Panel-ground Dual BNC Jacks feature a nickel-plated Zinc die-cast body and are available with or without a metal shield cover.

 Dual BNC Right-Angle Connectors consume 50% less PCB real estate as compared to two right-angle connectors mounted side by side.

• Snap-in board locks secure connectors to the PCB prior to soldering and prevent the connectors from lifting or leaning out of position during production assembly.

 Panel-ground Jacks are available with or without a rear metal cover which provides EMI shielding as well as protecting the contacts from contaminants.
