

Product Number: CY3210-27X43

CY3210 - CY8C27x43 PSoC(R) Evaluation Pod (EvalPod)

Overview:

PSoC EvalPods are 28-pin PDIP adapters that seamlessly connect any PSoC device to the 28-pin PDIP connector on any Cypress PSoC developer kit. CY3210-27x43 provides evaluation of the CY8C27x43 PSoC device family on any PSoC developer kit. PSoC developer kits sold separately.

CY3210-27x43 Kit Contents:

- One (1) CY8C27x43 PSoC EvalPod

Hardware Description:

PSoC EvalPods are pods that connect to the ICE In-Circuit Emulator (CY3215-DK kit) to allow debugging capability. They can also function as a standalone device without debugging capability. The EvalPod has a 28-pin DIP footprint on the bottom for easy connection to development kits or other hardware. The top of the EvalPod has prototyping headers for easy connection to the devices pins. CY3210-27x43 provides evaluation of the CY8C27x43 PSoC device family.
