

Part Number: 17252

FOOT GROUND, HEEL, NON-MARRING 1MEG

- **Non-marring interior and exterior dissipative rubber**
Will not mar shoes or floors - reduces maintenance costs of touching up floors
- **Hook and loop fastening assembly**
Genuine "non-selvedged" Velcro® material - adjustable and comfortable
- **30" long, 8 strand nylon polyester grounding tab**
Does not particulate; superior body to ground contact
- **Reversible static dissipative 3-layer rubber**
Extended life expectancy; exceptional wear resistance, able to use all four wearing surfaces
- **Bright yellow rubber cup**
High visibility to ensure program compliance
- **No exposed carbon**
Ideal for cleanrooms

Compliance verification should be performed prior to each use (daily, shift change, etc.). The accumulation of insulative materials may increase the foot grounder system resistance. If foot grounders are worn outside the ESD protected area testing for functionality before reentry to the ESD protected area should be considered.

ESD protective flooring, used with approved footwear, may be used as an alternative to the wrist strap system for standing operations.

If the contact area between the bottom of the foot and the floor is not continuous, charge generation may occur especially when a person is walking. Heel straps must be worn on both feet to minimize the amount of time that the body of the person is isolated from ground while walking.
