

Fibocom L610-EU

LTE Cat1 bis Wireless Communication Module Specially Designed for IoT Applications

Key Benefits

- Support multiple network frequency bands and rich Internet protocols
- Rich extension of interfaces allowing much flexibility and ease of integration for customer's applications
- Provide IoT industry reference design and timely technical support to help customers quickly complete product development
- High performance LTE Cat1 bis IoT module with ultra-high cost performance

Release 13

L610-EU is a LTE Cat1 bis wireless communication module adopting LCC+LGA form factor, with the size of 31mm* 28mm* 2.35mm. It is pin-to-pin compatible with Fibocom' s LTE Cat 4 module NL668/L716, which is convenient for customers to migrate between different technologies at the lowest cost. L610-EU supports a rich extension of interfaces (USB/ UART/ SPI/ I2C/ SDIO), enabling much flexibility and ease of integration to meet various application demands of the IoT industry. The module has three regional version, with L610-EU covering the frequency bands of major operators in Europe, L610-CN for Asia, and L610-LA for Latin America respectively.

LTE Cat1 bis

L610-EU perfectly suitable for low and mid-speed IoT scenarios, such as smart payment, sharing economy, industrial IoT, asset tracking, automotive aftermarket, etc., providing customers with reliable connectivity and robust security.

LCC + LGA package

L610-EU supports LTE and GSM networks, as well as VoLTE, BLE, WiFi-scan, and optionally GNSS.
