

Low Range 3 Watt SMT Chip Resistor

LRF3W Series

- Tolerances to $\pm 1\%$
- 3 Watt @70°C power dissipation in a compact 1225 package
- Resistance range from 0.002 to 0.100 Ω
- Ideal for high current sensing applications
- Standard Sn/Pb and Pb-free (matte tin) terminations available

IRC's LRF3W series combines high power capabilities with small chip size and very low resistance to handle your current sensing needs.

The LRF3W utilizes IRC's proprietary thick film materials which possess superior thermal conductivity over other technologies. The result is significantly lower operating temperature and higher power dissipation.

Termination on the long sides minimizes TCE mismatch to PCBs.
