HIGH CAPACITY

Consumer SDHC Class 4 Card

Performance and capacity redefined.

Kingston Technology's Secure Digital High Capacity (SDHC) memory cards are fully compliant with the latest SD Association specification. They are a performance class of SD memory cards designed to meet the storage demands of high-quality digital still and video cameras and other personal electronic devices.

Starting at 4GB, SDHC cards offer larger-volume data storage and optimised recording performance with support for FAT 32 file formats. In addition, Kingston's SDHC cards feature Class 4 speed ratings that deliver a minimum data transfer rate of 4MB/s for optimum performance with SDHC devices.

Although identical in size to standard SD cards, SDHC cards are designed differently and are recognised only by SDHC & SDXC host devices. To ensure compatibility, look for the SDHC logo on cards and host devices (cameras, camcorders etc.).

For added reliability and durability, our solid-state SDHC memory cards are built of non-volatile memory components and have no moving parts that could wear out or break. All cards are 100 percent tested and backed by a lifetime warranty.

Consumer SDHC Class 4 Card

FEATURES/BENEFITS

- > **Compliant** — with the SD Card Association specification
- > **Secure** — built-in write-protect switch prevents accidental data loss
- > **Compatible** — with SDHC and SDXC host devices; not compatible with standard SD-enabled devices/readers
- > **File format** — FAT32
- > **Reliable** — lifetime warranty, free technical support

SPECIFICATIONS

- > **Capacities*** 4GB, 8GB, 16GB, 32GB
- > **Dimensions** 0.94" x 1.25" x 0.08" (24mm x 32mm x 2.1mm)
- > **Speed class rating**
 - Class 4: 4MB/s minimum data transfer rate
- > **Storage temperatures** -40°F to 185°F (-40°C to 85°C)
- > **Operating temperatures** -13°F to 185°F (-25°C to 85°C)
- > **Voltage** 3.3V

* Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Guide at kingston.com/flash_memory_guide.

** These Class 10 cards are designed for HD video recording but do not support some simultaneous video and still capture features.
