# PRODUCT FAMILY DATA SHEET

**3528B0 (0.5W)**

MODEL NAME : LEMWS28U80 Series

**RoHS**  
Compliant

**Halogen**  
Compliant

## CONTENTS

|  |         |
|--|---------|
| 1. Features -----                              | 3       |
| 2. Applications -----                          | 3       |
| 3. Outline Dimensions -----                    | 3       |
| 4. Absolute Maximum Ratings -----              | 4       |
| 5. Electro-Optical Characteristics -----       | 4 ~ 5   |
| 6. Flux Characteristics and Order Code -----   | 6       |
| 7. Chromaticity Bins -----                     | 7 ~ 10  |
| 8. Typical Characteristic Curves -----         | 11 ~ 19 |
| 9. Reliability Test Items and Conditions ----- | 20      |
| 10. Packing and Labeling of Products -----     | 21 ~ 23 |
| 11. Cautions on Use -----                      | 24 ~ 27 |
| Appendix -----                                 | 28      |

## 1. Features

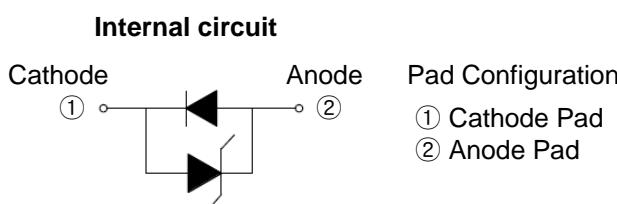

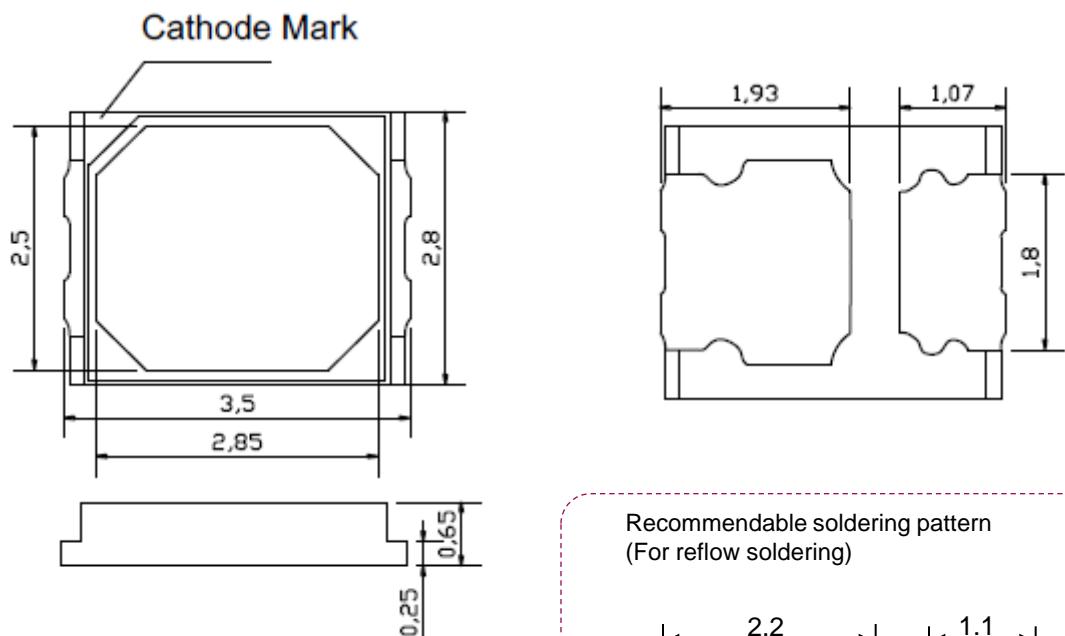

- Lighting Color : White
- Lead Frame Type LED Package :  $2.8 \times 3.5 \times 0.65$  (L x W x H) [Unit : mm]
- Viewing Angle :  $120^\circ$
- Chip Material : InGaN
- Soldering Methods : Reflow soldering
- Taping : 8 mm conductive black carrier tape and antistatic clear cover tape  
3,500 pcs/reel,  $\Phi 178$  mm reel

## 2. Applications

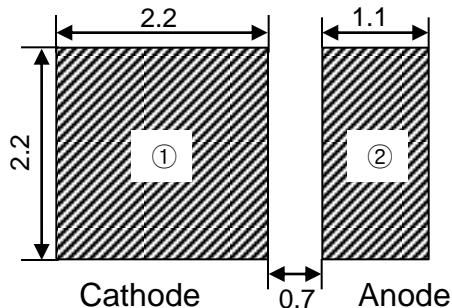

- Interior Illumination

## 3. Outline Dimensions

( Unit : mm )

Recommendable soldering pattern  
(For reflow soldering)

Tolerances unless otherwise mentioned are  $\pm 0.10$  mm

## 4. Absolute Maximum Ratings

( Ta = 25°C )

| Item                                      | Symbol           | Rating     | Unit |
|---|------------------|------------|------|
| Forward Current                           | If               | 180        | mA   |
| Peak Pulse Forward Current <sup>*1)</sup> | Ifp              | 400        | mA   |
| Operating Temperature                     | Topr             | -40 ~ +85  | °C   |
| Storage Temperature                       | Tstg             | -40 ~ +100 | °C   |
| Junction Temperature                      | Tj               | 110        | °C   |
| Soldering Temperature                     | JEDEC-J-STD-020D |            |      |

\*1) Pulse width ≤ 10ms and duty cycle ≤ 10%

※ Operating the LED beyond the listed maximum ratings may affect device reliability and cause permanent damage.  
These or any other conditions beyond those indicated under recommended operating conditions are not implied.

The exposure to the absolute maximum rated conditions may affect device reliability.

※ The LEDs are not designed to be driven in reverse bias.

## 5. Electro - Optical Characteristics

( Ta = 25°C , If = 150mA )

| Item  | Symbol    | CCT      | Min.                         | Typ. | Max. | Unit  |
|---|-----------|----------|------------------------------|------|------|-------|
| Luminous Flux   | Φv        | 6500 (F) | 54.0                         | 58.0 | 62.0 |       |
|   |           | 5700 (G) | 54.0                         | 58.2 | 62.0 |       |
|   |           | 5000 (H) | 54.0                         | 58.1 | 62.0 |       |
|   |           | 4000 (J) | 54.0                         | 58.2 | 62.0 | lm    |
|   |           | 3500 (K) | 52.0                         | 56.5 | 60.0 |       |
|   |           | 3000 (L) | 50.0                         | 54.7 | 58.0 |       |
|   |           | 2700 (M) | 48.0                         | 53.1 | 56.0 |       |
| Forward Voltage   | Vf        | All      | 3.0                          | 3.2  | 3.4  | V     |
| Color   | Cx / Cy   | All      | Refer to 'Chromaticity Bins' |      |      | -     |
| Viewing Angle   | 2Θ1/2     | All      | -                            | 120  | -    | deg   |
| Color Rendering Index (Ra)  | -         | All      | 80                           | -    | -    | -     |
| Thermal Resistance, Junction to Solder Point                      | Rth j-s   | All      | -                            | 20   | -    | °C/W  |
| Typical Temperature Coefficient of Forward Voltage <sup>*1)</sup> | ΔVf / ΔTj | All      | -1.0                         | -    | -3.0 | mV/°C |

\*1) Measured at Ta between 25 °C and 85 °C.

※ These values are measured by the LG Innotek optical spectrum analyzer within the following tolerances.

Luminous Flux (Φv) : ± 7%, Forward Voltage (Vf) : ± 0.1V, Color Value : ± 0.005, CRI Value : ± 2,

※ Although all LEDs are tested by LG Innotek equipment, some values may vary slightly depending on the conditions of the test equipment.

## 5. Electro - Optical Characteristics

| CCT          | If (mA)    | Vf (V) | Power (W) | $\Phi_v$ (lm) | lm/W |
|--------------|------------|--------|-----------|---------------|------|

## 7. Chromaticity Bins

LG Innotek complies with the ANSI C78.377A standard for its chromaticity bin structure. For each ANSI quadrangle for the CCT range of 2700K to 6500K, LG Innotek provides 6 micro bins.

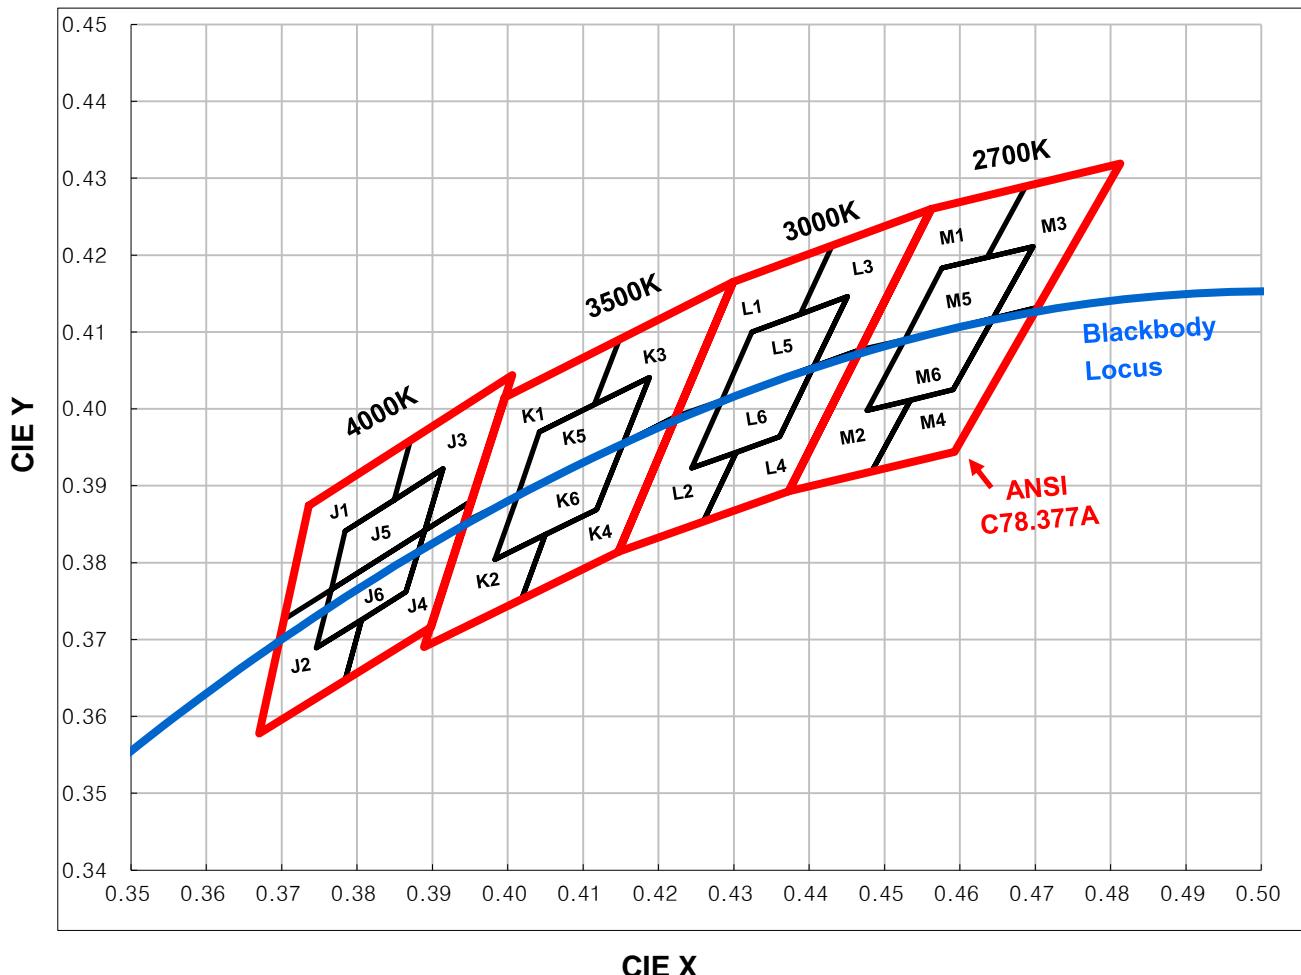

| Bin | CIE X  | CIE Y  | Bin | CIE X  | CIE Y  | Bin | CIE X  | CIE Y  |
|-----|--------|--------|-----|--------|--------|-----|--------|--------|
| F1  | 0.3048 | 0.3209 | G1  | 0.3215 | 0.3353 | H1  | 0.3371 | 0.3493 |

## 8. Typical Characteristic Curves

### ▪ Chromaticity Coordinate vs. Temperature

\* 5000K CCT data also applies to 5700K and 6500K CCTs and 3000K data also applies to 2700K, 3500K and 4000K CCTs.

## 8. Typical Characteristic Curves

- Forward Voltage vs. Temperature

※ The ambient temperature values for each graph are obtained with LG Innotek equipment.

## 9. Reliability Test Items and Conditions

### 9-1. Failure Criteria

| Items           | Symbol | Test Conditions | Criteria            |                     |
|-----------------|--------|-----------------|---------------------|---------------------|
|                 |        |                 | Min.                | Max.                |
| Forward Voltage | Vf     | If = 180mA      | -                   | Initial Value × 1.1 |
| Luminous Flux   | Φv     | If = 180mA      | Initial Value × 0.7 | -                   |

### 9-2. Reliability Tests

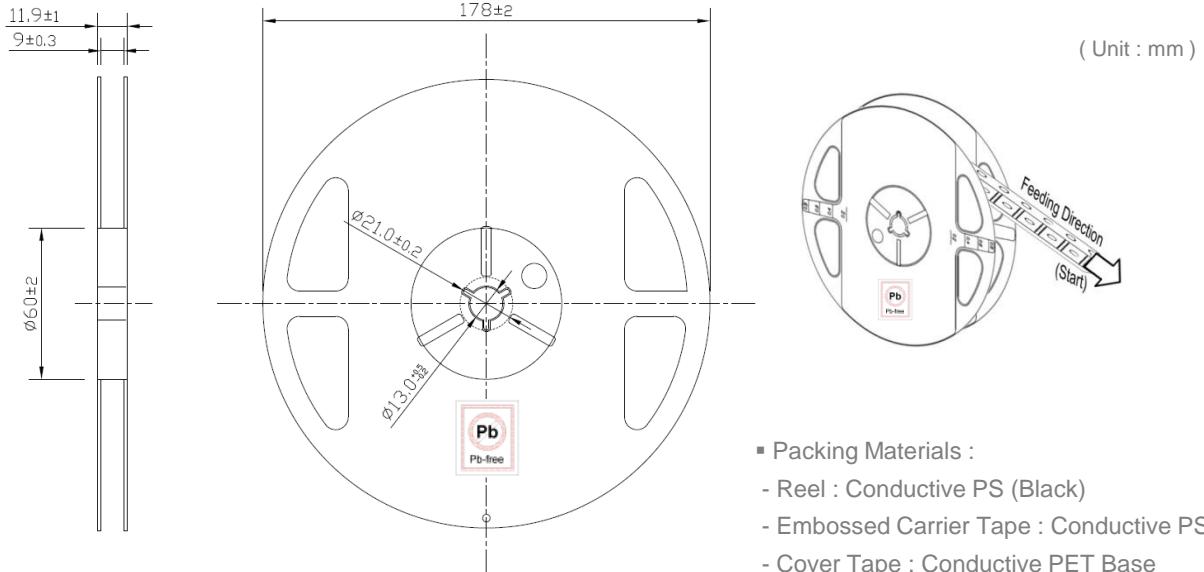

| No | Items                                       | Test Conditions   | Test Hours /Cycles | Sample Size | Ac/Re |
|----|---|---|--------------------|-------------|-------|
| 1  | Room Temperature Operating Life (RTOL)      | Ta = 25°C, If = 180mA   | 1,000 Hours        | 20 pcs      | 0/1   |
| 2  | Wet High Temperature Operating Life (WHTOL) | Ta = 60°C, RH = 90%<br>If = 180mA                                   | 1,000 Hours        | 20 pcs      | 0/1   |
| 3  | High Temperature Operating Life (HTOL)      | Ta = 85°C, If = 180mA   | 1,000 Hours        | 20 pcs      | 0/1   |
| 4  | Low Temperature Operating Life (LTOL)       | Ta = -40°C, If = 180mA  | 1,000 Hours        | 20 pcs      | 0/1   |
| 5  | High Temperature Storage Life (HTSL)        | Ta = 100°C  | 1,000 Hours        | 20 pcs      | 0/1   |
| 6  | Low Temperature Storage Life (LTSL)         | Ta = -40°C  | 1,000 Hours        | 20 pcs      | 0/1   |
| 7  | Wet High Temperature Storage Life (WHTSL)   | Ta = 85°C, RH = 85%   | 1,000 Hours        | 20 pcs      | 0/1   |
| 8  | Temperature Cycle (TC)                      | -40°C(30min) ~ 100°C(30min)   | 100 Cycles         | 20 pcs      | 0/1   |
| 9  | Moisture Sensitivity Level (MSL)            | Tsld = 260°C<br>(Pre treatment 60°C, 60%<br>168 hours)              | 3 Times            | 20 pcs      | 0/1   |
| 10 | Vibration                                   | 100~2000~100Hz<br>Sweep 4min.<br>200m/s <sup>2</sup> , 3 directions | 48 Minutes         | 20 pcs      | 0/1   |

※ All samples are tested using LG Innotek Standard Metal PCB (25x25x1.6 mm<sup>3</sup> (L×W×H)) except MSL test .

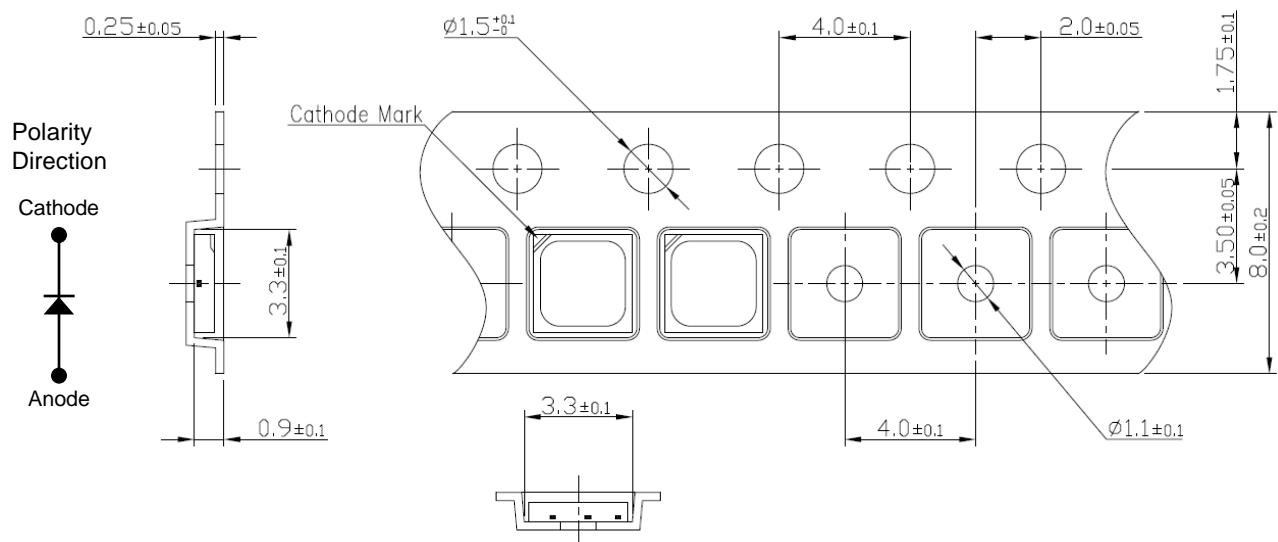

※ All samples must pass each test item and all test items must be satisfied.

## 10. Packing and Labeling of Product

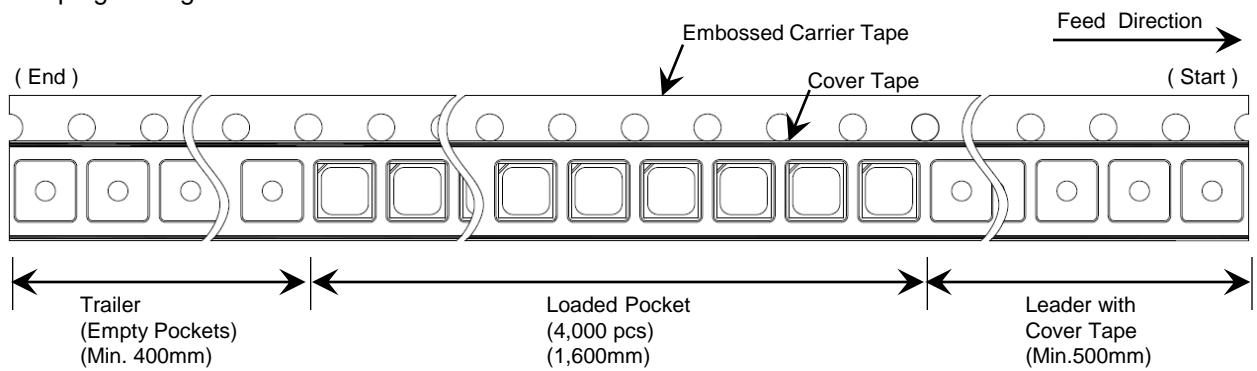

### 10-1. Taping Outline Dimensions

- Packing Materials :
- Reel : Conductive PS (Black)
- Embossed Carrier Tape : Conductive PS (Black)
- Cover Tape : Conductive PET Base

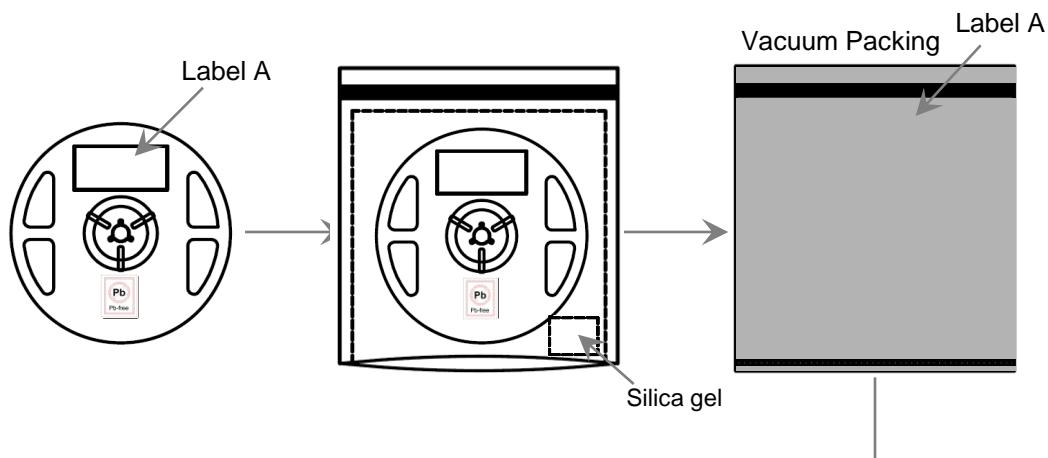

Taping Arrangement

## 10. Packing and Labeling of Product

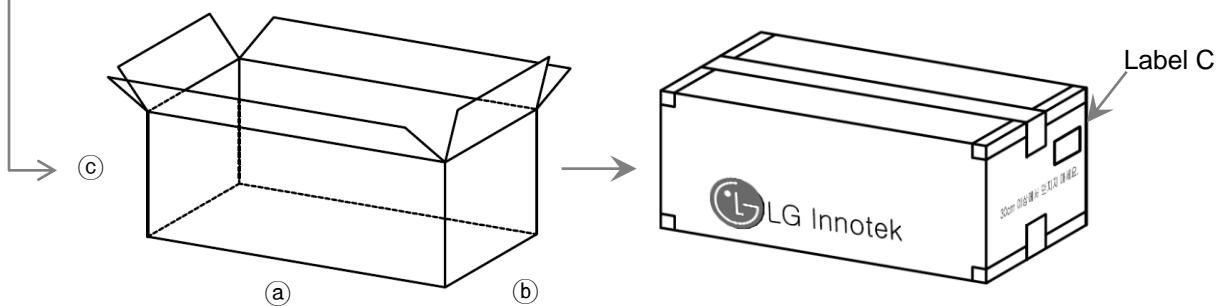

### 10-2. Packing Structures

Reeled products are packed in a sealed-off and moisture-proof aluminum bag with desiccants (silica gel). 24 Reels are packed in an outer box.

| Types     | Sizes (mm) |     |     |
|-----------|------------|-----|-----|
|           | (a)        | (b) | (c) |
| Outer Box | 530        | 240 | 280 |

Tolerance :  $\pm 10\text{mm}$

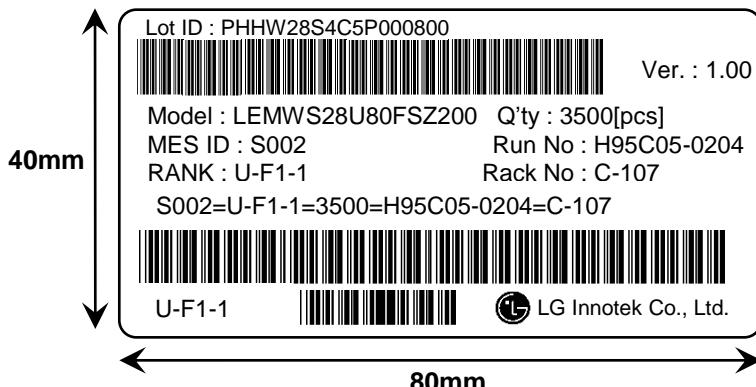

## 10. Packing and Labeling of Product

### 10-3. MES Label Structure

#### ※ Label A

Specifying Lot ID, 'Model Name', 'MES ID', 'RANK', 'Q'ty', 'Run No.', 'Rack No.'

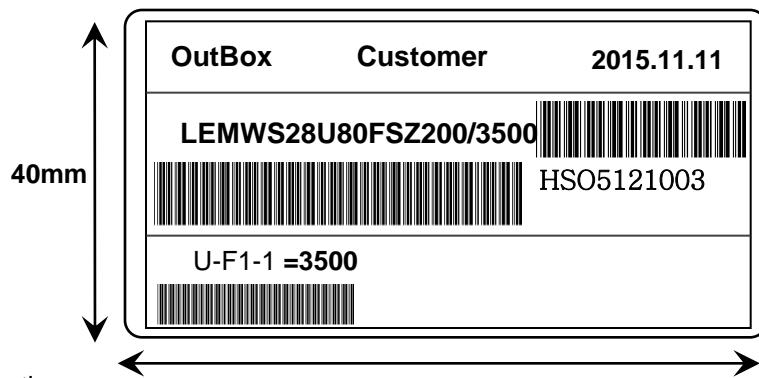

#### ▪ Run No. indication

| Code | Manufactured Site       | Manufactured Year                                   | Manufactured Month | Manufactured Date | TH #        | Serial No   |

## 11. Cautions on Use

### 11-1. Moisture-Proof Package

- The moisture in the SMD package may vaporize and expand during soldering.
- The moisture can damage the optical characteristics of the LEDs due to the encapsulation.

### 11-2. During Storage

| Conditions |                             | Temperature | Humidity | Time                                 |
|------------|-----------------------------|-------------|----------|--------------------------------------|
| Storage    | Before Opening Aluminum Bag | 5°C ~ 30°C  | < 50% RH | Within 1 Year from the Delivery Date |
|            | After Opening Aluminum Bag  | 5°C ~ 30°C  | < 60% RH | ≤ 672 Hours                          |
|            | Baking                      | 65 ± 5°C    | < 10% RH | 10 ~ 24 Hours                        |

### 11-3. During Usage

- The LED should avoid the direct contact with hazardous materials such as sulfur, chlorine, phthalate, etc..
- The metal parts on the LED can rust when exposed to corrosive gases. Therefore, exposure to corrosive gases must be avoided during operation and storage.
- The silver-plated metal parts also can be affected not only by the corrosive gases emitted inside of the end-products but by the gases penetrated from outside environment.
- Extreme environments such as sudden ambient temperature changes or high humidity that can cause condensation must be avoided.

### 11-4. Cleaning

- Do not use brushes for cleaning or organic solvents (i.e. Acetone, TCE, etc..) for washing as they may damage the resin of the LEDs.
- Isopropyl Alcohol (IPA) is the recommended solvent for cleaning the LEDs under the following conditions.  
Clearing Condition : IPA, 25°C max. × 60 sec max.
- Ultrasonic cleaning is not recommended.
- Pretests should be conducted with the actual cleaning process to validate that the process will not damage the LEDs.

## 11. Cautions on Use

### 11-5. Thermal Management

- The thermal design of the end product must be seriously considered, particularly at the beginning of the system design process.
- The generation of heat is greatly impacted by the input power, the thermal resistance of the circuit boards and the density of the LED array combined with other components.

### 11-6. Static Electricity

- Wristbands and anti-electrostatic gloves are strongly recommended and all devices, equipment and machinery must be properly grounded when handling the LEDs, which are sensitive against static electricity and surge.
- Precautions are to be taken against surge voltage to the equipment that mounts the LEDs.
- Unusual characteristics such as significant increase of current leakage, decrease of turn-on voltage, or non-operation at a low current can occur when the LED is damaged.

### 11-7. Recommended Circuit

- The current through each LED must not exceed the absolute maximum rating when designing the circuits.
- In general, the LED forward voltages can vary. LEDs in parallel that have different forward voltages in combination with a single resistor can result in different forward currents to each LED, which can also output different luminous flux values. In the worst case, the currents can exceed the absolute maximum ratings which can stress the LEDs. Matrix circuit with a single resistor for each LED is recommended to avoid luminous flux fluctuations.

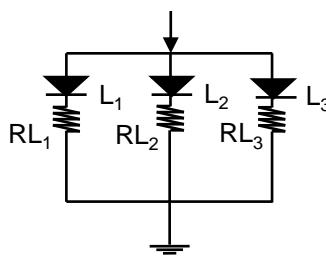

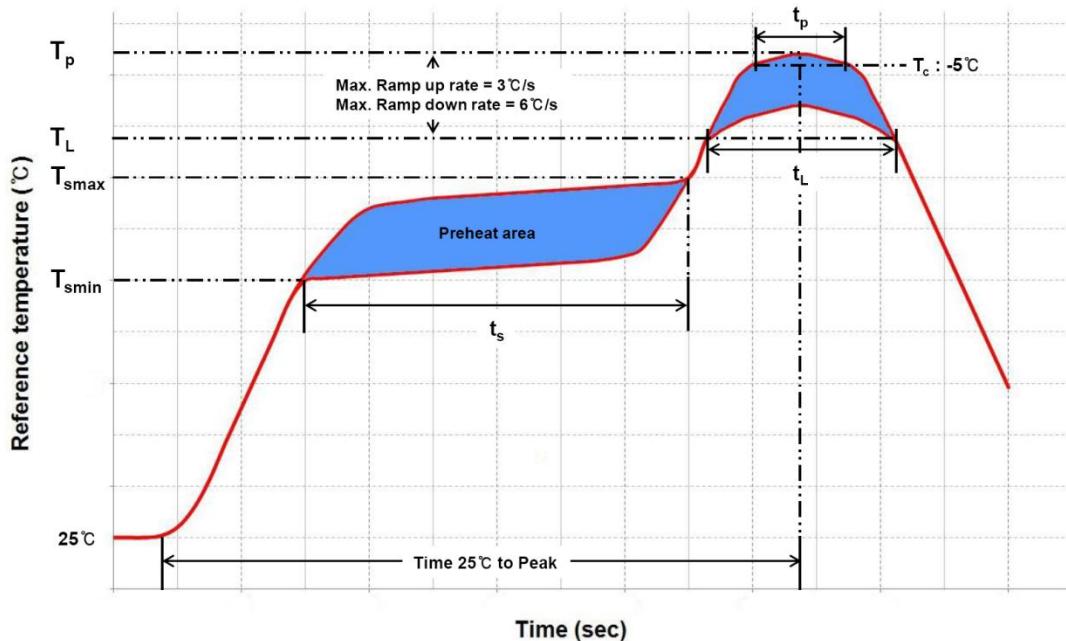

Fig.1 Recommended Circuit in Parallel Mode  
: Separate resistors must be used for each LED.

- The driving circuits must be designed to operate the LEDs by forward bias only.
- Reverse voltages can damage the zener diode, which can cause the LED to fail.
- A constant current LED driver is recommended to power the LEDs.

## 11. Cautions on Use

### 11-8. Soldering Conditions

- Reflow soldering is the recommended method for assembling LEDs on a circuit board.
- LG Innotek does not guarantee the performance of the LEDs assembled by the dip soldering method.
- Recommended Soldering Profile (according to JEDEC J-STD-020D)

| Profile Feature   | Pb-Free Assembly  | Pb-Based Assembly |
|---|-------------------|-------------------|
| Preheat/Soak  |                   |                   |
| Temperature Min( $T_{s\min}$ )                                  | 150°C             | 100°C             |
| Temperature Max( $T_{s\max}$ )                                  | 200°C             | 150°C             |
| Maximum time( $t_s$ ) from $T_{s\min}$ to $T_{s\max}$           | 60~120 seconds    | 60~120 seconds    |
| Ramp-up rate ( $T_L$ to $T_p$ )                                 | 3°C / second max. | 3°C / second max. |
| Liquidous temperature ( $T_L$ )                                 | 217°C             | 183°C             |
| Time ( $t_L$ ) maintained above $T_L$                           | 60~150 seconds    | 60~150 seconds    |
| Maximum peak package body temperature ( $T_p$ )                 | 260°C             | 235°C             |
| Time( $t_p$ ) within 5°C of the specified temperature ( $T_c$ ) | 30 seconds        | 20 seconds        |
| Ramp-down rate ( $T_p$ to $T_L$ )                               | 6°C/second max.   | 6°C/second max.   |
| Maximum Time 25°C to peak temperature                           | 8 minutes max.    | 6 minutes max.    |

- Reflow or hand soldering at the lowest possible temperature is desirable for the LEDs although the recommended soldering conditions are specified in the above diagrams.
- A rapid cooling process is not recommended for the LEDs from the peak temperature.
- The silicone encapsulant at the top of the LED package is a soft surface, which can easily be damaged by pressure. Precautions should be taken to avoid strong pressure on the silicone resin when leveraging the pick and place machines.
- Reflow soldering should not be done more than two times.

## 11. Cautions on Use

### 11-9. Soldering Iron

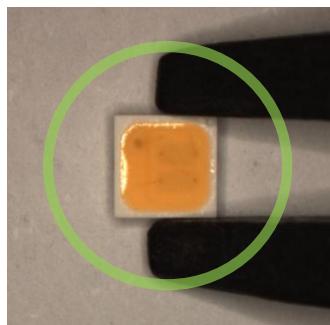

- The recommended condition is less than 5 seconds at 260 °C.
- The time must be shorter for higher temperatures. (+10 °C → -1sec).
- The power dissipation of the soldering iron should be lower than 15W and the surface temperature of the device should be controlled at or under 230 °C.

### 11-10. Eye Safety Guidelines

- Do not directly look at the light when the LEDs are on.
- Proceed with caution to avoid the risk of damage to the eyes when examining the LEDs with optical instruments.

### 11-11. Manual Handling

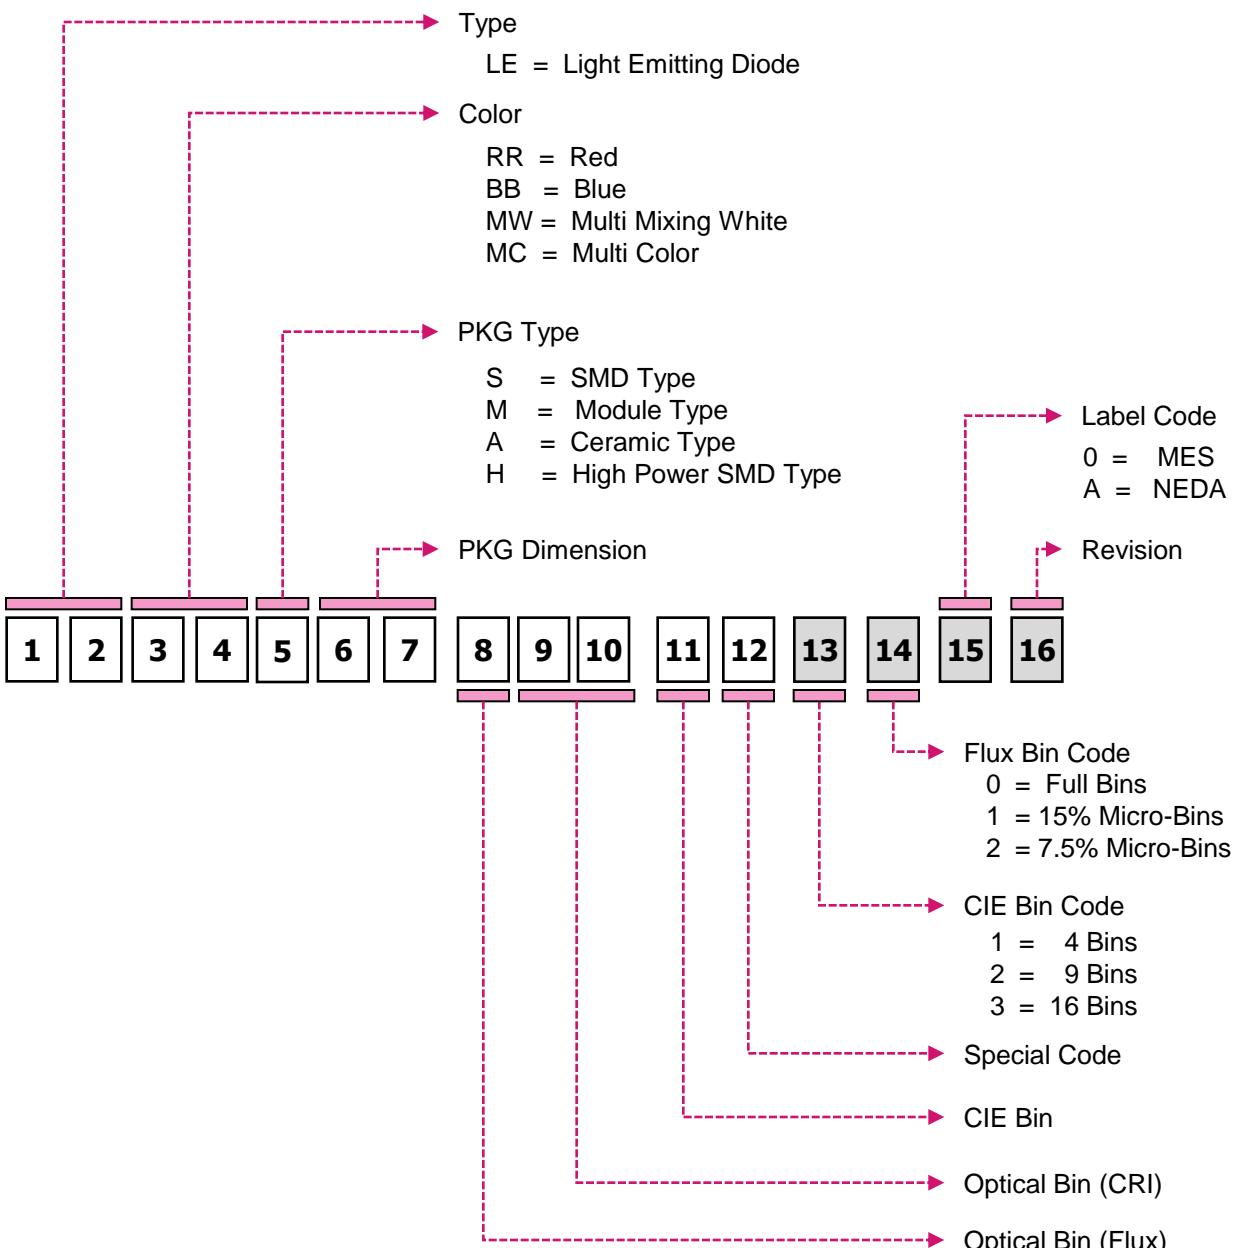

- Use Teflon-type tweezers to grab the base of LED and do not apply mechanical pressure on the surface of the encapsulant.

## Appendix. Nomenclature of Package

All LEDs are tested and sorted by color, luminous flux and forward voltage where every LED in a tube has only a single color bin, luminous flux bin and forward voltage bin. However, the forward voltage bin information is not captured in the part number nomenclature.

A 16-digit part number is required when orders are placed. LG Innotek leverages the following part number nomenclature.

## Datasheet
