

Fortimo LED line system

Fortimo LED Line 2ft 2200lm 765 1R HV1

Fortimo LED Line systems are the replacement for fluorescent lighting. These systems are characterized by high energy efficiency levels, surpassing T5 systems, at the lowest possible cost. They also offer high quality white light in terms of colour rendition and colour consistency delivering a truly future proof solution. This Fortimo LED Line range consists of linear, white light LED Boards and Xitanium linear drivers. They are intended for luminaire manufacturers who want to replace linear fluorescent as the light source in many different types of luminaires for general lighting. The portfolio consists of 2 main ranges which have been differentiated by the number of rows of LEDs contained on the board. The associated linear Xitanium driver portfolio includes isolated and non isolated drivers, in fixed light output, 1-10V and DALI versions.
