# Developing with Cinterion® Modules

DSB-mini
The cost-effective
DSB75 alternative
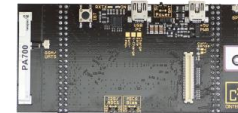

DSB75
Fully-fledged
development board

Adapter Boards
Combines with the
module of your choice

Starter Kit
Developing within
minutes

Evaluation Modules
Cinterion SMT modules
available on B2B format

LGA DevKit Module
evaluation kit suitable for
all industrial and most
industrial plus LGA
modules

gemalto

LGA DevKit

Module evaluation kit suitable for all footprints

Socket solution for developing with **LGA** modules.
Compatible with all Industrial and most Industrial Plus LGA modules.
Clear & easy concept for usage and signaling

Supports LGA footprint Industrial (SM) and parts of IndustrialPlus (L)

Operates stand alone as well as in DSB environment

Real current measurement from uA to A

Access and/or disconnect all module signals

Fasten the module intergration

Documentation access through GTO website/ QR code on PCB

gemalto

DSB75

All-round development board

DSB75 is designed to support system integrators in developing and evaluating products based on Cinterion Wireless Modules. The DSB75 is compatible with all DSB-Adapter boards.
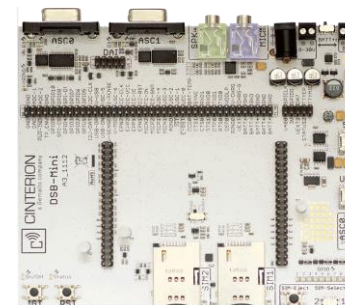

USB	Antenna Interface
3x Serial Ports	10x GPIOs accessible from pin header
I2C and SPI	ADC and DAC
Digital and Analog Audio	23x LED indicator for control, RS232 and GPIO
SD Card Interface	
SIM Interface (1.8/3.0V)	All module signals accessible

gemalto

DSB-mini

## Cost-optimized development board

DSB-mini is the alternative to DSB75 including two USB ports, dual SIM support and pads for a component SIM. The DSB-mini is compatible with all DSB-Adapter boards, the Multi-Adapter R1 and all Starter Kits.

2x RS232	DAI interface
USB	Prepared for component SIM
Audio connector for conventional headsets	LED indicator for control, RS232 and GPIO
Power supply through USB, 8-30 V or battery	All module signals accessible
Dual SIM interface	Automatic driver level adjustment

gemalto

Starter Kit

A perfect way to kick off your design

Simple environment which allows you to start developing within a few minutes. Includes on-board antennas. Compatible with most 80-pin B2B modules and evaluation boards.

Compatible with 80-pin Modules and Evaluation Boards	Power supply through USB or DSB
Fits on DSB-mini	Prepared for component SIM
USB connector	On-board septa-band cellular antenna (SK-B80)
On-board LEDs	On-board GPS antenna (SK-B80)
SIM card holder	

gemalto

Adapters for DSB75 or DSB mini

AH6-DSB75 Adapter   L30960-N2301-A100

EVAL-DSB Adapter Rev.1   *L30960-N0100-A100*   *Successor of AH6-DSB75 Adapter (SOP Q2 2019)*
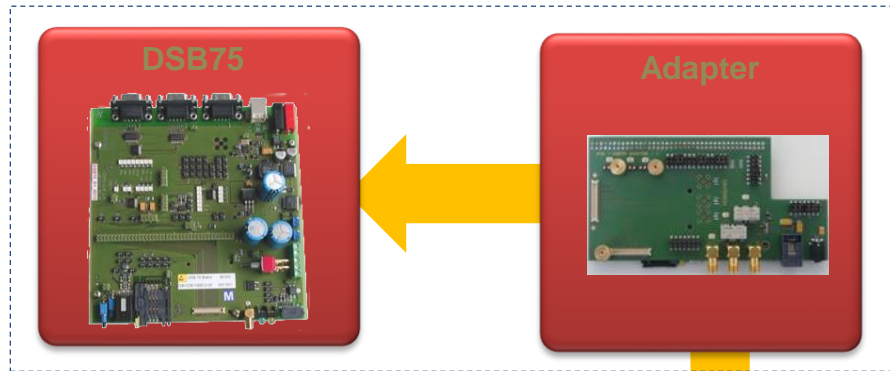

ALAS6-DSB75 Adapter   L30960-N4103-A100

gemalto

# Connectivity options: DSB75 - DSB mini with Adapter – Starter Kit

Broadest function scope

- Combine **DSB75** and **Adapter** for broadest testing scope including industry standard audio connectors, serial ports, USB and full-access to module pins

Cost-efficient development

- Use **Starter Kit** as a stand alone solution to evaluate Cinterion ® Wireless Modules

- Combine with **DSB-mini** to expand the supported interfaces
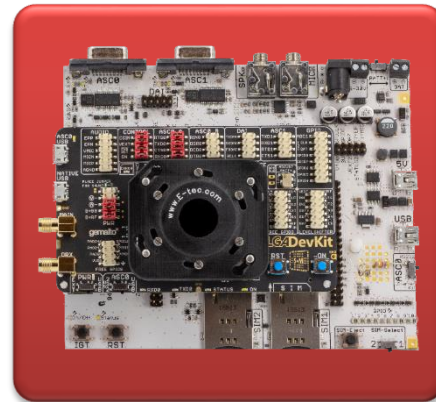

gemalto

Connectivity options: LGA DevKit with DSB75 - DSB mini

- Use **LGA DevKit** as a stand alone solution to evaluate Cinterion ® **LGA** Modules

- Combine with **DSB-mini or DSB75** to expand the supported interfaces with SUB-D9, 2. SIM, Analog audio interface

gemalto

Adapter LTE Modem Card   **L30960-N3202-A300**

Package content
• 1 USB Cable (USB Connector A to USB Mini Connector B)
• 3 Hirose Antenna cables
• 2 GMS/UMTS/LTE Antennas GNSS Antenna and Power supply are not part of the LTE Modem Card Adapter Board delivery.

- For all LTE Modem Cards mPLSx and mPLASx

- Adapter LTE Modem Card can operate stand-alone => suitable for field tests

- 2x SIM Interface

- 3x Antenna connectors

- 1x USB Interface

- Power Supply 3.3V

- PCI Express® Mini Card system connector for LTE Modem Card

- Reference environment
