--------	--------------	----------	---------------	--------------	-------

RoHS WEEE Pb free surface compliant

Dimensions: mm (in.)

Length of Jumper (L)  
L = (No. of Poles x Center to Center Spacing)

When locating connector, allow 0.5 mm clearance around it for process-induced variations.

**Description**

Series 300-J jumper combs are designed for use with series 300 terminal strips, and allow electrical connection between adjacent poles. Jumper combs are secured in the terminal strip by the wire clamping screws, the exposed portion of the jumper is insulated to prevent accidental shock or short circuiting.

- For use with 326, 327 /-FU and HDS versions
- For electrical connection between adjacent poles

**Technical Data**

2 to 12 poles
