Description

This 600 volt, 10 mm (0.393 in.) pitch PCB mounted barrier block has feed-through screw held wire connections above the PCB and special barriers that protrude through the PCB in slots prepared for that purpose. These blocks require slots to be cut through the printed circuit board to allow for the extended barriers designed into the base. PCB slots must measure 2.0 x 25.4 mm (0.079 x 1.000 in.).

- Barrier strip connector
- 1 or 2 PCB Pins per pole

Technical Data

Center to Center Spacing: 10 mm (0.394 in.)
Nominal Cross Section:
 2.5 mm² (3874 mils²)
Wire Stripping Length: 8.5 mm (0.33 in.)
Recommended Hole Diameter in PC Board:
 1.3 mm (0.051 in.)

Application

This block does everything other barrier blocks of its size do and more. These are excellent for single-phase or three-phase applications up to 600 volts. Lighting, motive power, HVAC and all connections where a heavy-duty block is required.

Dimensions: mm (in.)

Length of Connector (L)
 L = No. of Poles x Center to Center Spacing

When locating connector, allow 0.5 mm clearance around it for process-induced variations.
