

APT-CC-Vx-LN MODULES

Features

- > APT-CC controllers add advanced control features to constant current (CC) drivers
- > Integrated between the CC driver and LED modules, the DC modules are powered directly from the CC driver
- > Controlling 2 output channels, Correlated Color Temperature (CCT) can be calibrated precisely, independent of intensity
- > APT Programmer enables in-factory and in-field changes to control settings including CCT range and CCT mapping
- > Wired versions available with DMX512/RDM (VA), isolated 0-10V ports (VC) or non-isolated 0-10V ports (VD)
- > Wireless versions available (VWx) with Casambi BLE Mesh or Silvar BLE Mesh
- > Wireless controller versions available with either embedded antenna (EA) or whip antenna (WA)

Ordering Information

Product Code	Description
APT-CC-Vx-LN-wwww	Vx – Hardware version LN – Linear form factor wwww – Internal code provided by Arkalumen as a simplified configuration code for repeat orders
Hardware Version	Functionality
VA	DMX512/RDM
VC	0-10V (Isolated)
VD	0-10V (Non-isolated)
VWx	Wireless – BLE Mesh

System Architecture

Design Requirements
1. Color mixing of light is produced by adjusting the intensity ratio between two LED channels. Therefore, the maximum current should be determined by the LED channel with the lower maximum current of the two.
2. Intensity control in APT-CC controllers requires the use of constant current drivers equipped with an isolated 0-10V dimming port. This requirement applies to the DMX/RDM (VA) and wireless (VWx) versions.
3. APT controllers are designed to work with a wide range of drivers, but a fixture manufacturer must test the APT controller for driver compatibility and ensure proper system operation before installation.
4. Contact Arkalumen for information on compatibility of drivers and overall system architectures. The light fixture manufacturer is responsible for testing of all third party components and the overall system before installation.
Contact Arkalumen for technical support at support@arkalumen.com

Operating Conditions

Environmental	
Ambient Temperature, Range	-40 to +50°C
Case Material	Plastic

Mechanical Specifications

Figure 1 – APT-CC-Vx Mechanical Drawing

Dimensions	Inches
Length	6.20
Width	1.18
Height	0.78

Encasement Specifications	
Material	Plastic
RTI Elec	130 C

APT-CC-VA-LN MODULE (DMX512/RDM)

Electrical Specifications

Input

Port	Voltage		Unit	Current		Unit	Power	
	Min	Max		Min	Max		Min	Max
DC IN +/-	10	60	V	60	4,100	mA	-	100
0-10V OUT +/-	0	12	V	0	90	μA	-	-
DMX DATA +/-	-10	15	V	-0.8	1	mA	-	-

Output

Port	Voltage		Unit	Current		Unit	Power	
	Min	Max		Min	Max		Min	Max
CH1	-	60	V	0	4,040	mA	-	100
CH2	-	60	V	0	4,040	mA	-	100

Wiring Diagram

Ordering Information

Product Code	Description
APT-CC-VA-LN-<i>www</i>	VA – DMX/RDM hardware version LN – Linear form factor <i>www</i> – Internal code provided by Arkalumen as a simplified configuration code for repeat orders

Configuration Code	Description
DMXn-Ammm-<i>pppp</i>-Hxxx-Lyyy	DMXn – Number of DMX addresses assigned Ammm – Base DMX address <i>pppp</i> – Output control feature Hxxx – Max current threshold Lyyy – Min current threshold

Configuration Code Details

Code	Description	Option	Configuration Trait
DMXn	DMXn denotes DMX wired communication using <i>n</i> addresses.	DMX1	DMX wired communication using 1 DMX address
		DMX2	DMX wired communication using 2 DMX addresses
Ammm	mmm denotes the base address of the controller on a DMX bus.	A001	Lowest base address option
		A###	Base address specified between 1 and 512
		A512	Highest base address option
pppp	pppp denotes the output control features enabled on the controller.	IN00	Intensity control enabled, CCT control disabled
		00CT	Intensity control disabled, CCT control enabled
		INCT	Intensity and CCT control enabled
Hxxx	xxx denotes the maximum current as configured in the controller's firmware in 20mA increments.	0000	Intensity control disabled
		H###	Maximum current specified up to 4,100mA
		H410	Maximum current of 4,100mA (Default)
Lyyy	yyy denotes the minimum current as configured in the controller's firmware in 20mA increments.	0000	Intensity control disabled
		L###	Minimum current specified as low as 20mA
		L006	Minimum current of 60mA (Default)

APT-CC-VC-LN MODULE (0-10V ISOLATED)

Electrical Specifications

Input

Port	Voltage		V	Current		mA	Power		W
	Min	Max		Min	Max		Min	Max	
DC IN +/-	10	48	V	40	4,100	mA	-	100	W
0-10V IN (Sink)	0	20	V	98	104	μ A	-	-	
0-10V IN (Source)	0	20	V	0	300	μ A	-	-	

Output

Port	Voltage		V	Current		mA	Power		W
	Min	Max		Min	Max		Min	Max	
CH1	-	60	V	0	4,060	mA	-	100	W
CH2	-	60	V	0	4,060	mA	-	100	W

Wiring Diagram

Ordering Information

Product Code	Description
APT-CC-VC-LN-xxxx	VC – 0-10V (isolated) hardware version LN – Linear form factor xxxx – Internal code provided by Arkalumen as a simplified configuration code for repeat orders

Configuration Code	Description
CCTD-0000-00CT-0000-0000	CCTD – CCT control using a 0-10V dimmer 0000 – Reserved 00CT – CCT control enabled 0000 – Reserved 0000 – Reserved

The APT-CC-VC configuration code is static.

APT-CC-VD-LN MODULE (0-10V NON-ISOLATED)

Electrical Specifications

Input

Port	Voltage		Current		Power	
	Min	Max	Min	Max	Min	Max
DC IN +/-	13.5	60 V	20	4,100 mA	-	100 W
0-10V IN (Sink)*	0	9.36 V	-	6 mA	-	-

*Specification indicates port output ranges only, to be used exclusively with sinking 0-10V dimmers

Output

Port	Voltage		Current		Power	
	Min	Max	Min	Max	Min	Max
CH1	-	60 V	0	4,080 mA	-	100 W
CH2	-	60 V	0	4,080 mA	-	100 W

The APT-CC-VD configuration code is static.

APT-CC-VWx-LN MODULE (WIRELESS)

Electrical Specifications

Input

Port	Voltage		Unit	Current		Unit	Power	
	Min	Max		Min	Max		Min	Max
DC IN +/-	24	60	V	12	4,100	mA	-	100
0-10V OUT +/-	0	12	V	0	90	μA	-	-

Output

Port	Voltage		Unit	Current		Unit	Power	
	Min	Max		Min	Max		Min	Max
CH1	24	60	V	0	4,088	mA	-	100
CH2	24	60	V	0	4,088	mA	-	100

Wireless Operating Conditions ¹	
Maximum Transmitter Power	+4dBm
Operating Frequencies	2.4GHz
Maximum Open-Air Range	270m

Contains modular transmitter with FCC ID: X8WBM832, IC (Industrial Canada) ID: 4100A-BM832

Wireless signal range of the controller will decrease if placed in a metal enclosure or placed near other wireless devices operating at similar frequencies, keep the VWx controller at least 20cm away from other VWx controllers or wireless devices. The end product with this module may subject to perform FCC part 15 unintentional emission test requirement and be properly authorized.

This device is intended for OEM integrator only.

If used with ANT020 antenna or integrated PCB trace antenna, device does not require routine evaluation or SAR testing.
