

## Straight Plug Inserts

Texas Sockets

In addition to the standardized low voltage plug-in connections such as coaxial (in accordance with DIN 45323) and jack connectors (in accordance with DIN 45318), FRIWO also provides customized connecting cables. The wire diameter which is generally used in our units ranges from 0.25 mm<sup>2</sup> to 1.5 mm<sup>2</sup>. Both flat and round cables can be used.

FRIWO has its own plug system with self-cleaning fork contacts and the corresponding sockets for snap-in or PCB installation. This plug connection is available in 2- or 3-pin design. Beyond the safe contact due to the self-cleaning of the fork terminals, this system also provides the advantage of extremely small dimensions.

The low-voltage plugs shown only represent a selection of the comprehensive range. Customized designs, special versions and types with other dimensions can be obtained upon request.
