

Fixture-Integrated Sensor based on Bluetooth® mesh

Converts Luminaires into Multifunctional IoT Devices

Murata's Fixture-Integrated Sensor combines occupancy sensing, daylight harvesting, digital dimming and Bluetooth® radio circuits into a small package that fits into various luminaires. When used with compatible drivers, it enables any lighting manufacturer to deliver wirelessly-controllable and sensor-equipped fixtures with minimal engineering effort. Murata's Sensor-equipped luminaires just need to be connected to mains power and can be simply configured using an intuitive mobile app. The result is increased occupant comfort and energy savings that meet the most demanding building energy codes. By leveraging SIG-Qualified Bluetooth® mesh, the first wireless standard for professional lighting applications which ensures unmatched scalability and reliability, the wireless lighting control system can be seamlessly expanded with Bluetooth® mesh-certified products and/or compatible Bluetooth® switches as needed.
